ANNEXURE-I TO THE DIRECTORS' REPORT

MANAGEMENT DISCUSSION AND ANALYSIS

The Management of the Company is pleased to present Management Discussion and Analysis Report (to the extent applicable to the company) covering overall performance and outlook of its activities.

MACRO ECONOMIC OVERVIEW

Resilient Indian Economy :

Despite its legendary resilience, the Indian economy faced an uphill task in the financial year 2011-12. GDP growth dropped to 6.9 percent in the quarter ending in September 2011, registering the slowest year-on-year increase in the past two years. During the second half of 2012, a variety of factors, including monetary tightening, rupee depreciation and continued turmoil in the Euro zone, fuelled anxiety about India's macroeconomic and industrial outlook for 2012. Policymakers' approach of pushing for growth, with less focus on the productive dynamic, has translated into increased signs of macro stability risks emerging in the form of higher inflation, fiscal deficit and current account deficit. Sustaining high growth is likely to be the overarching concern in 2012-13, although the risk of inflation will remain, largely because of a weakening rupee. Inflation worries are likely to lighten, with food inflation declining steadily. However, the proposed Food Security Bill will widen the fiscal deficit further. There are many important policy reforms in the pipeline in 2012, such as land acquisition reform, new manufacturing policy, deferred FDI in retail, among others. This is also the year when the government has set its targets to achieve its ambitious goal of total electrification of villages. Therefore, the year ought to be definitely an action-packed one from the perspective of economic development.

The most pressing task for the government will be to get the investment cycle buoyant again. Higher public investment appears unlikely given the tight fiscal situation due to the uncontrolled revenue spending which has led to uncontrollable inflation. Private investment activity has been slack due to numerous uncertainties facing corporates. The large Indian companies are sitting on a pile of cash which they are refraining to use to build fresh capacity. The obvious way would be to rebuild corporate confidence, and that can be achieved only through the implementation of a well-studied actionable agenda. The few sectors that have a significant multiplier effect

on the rest of the economy could be given special attention. These include construction of new roads, a reinvigorated national highway programme, or construction of affordable housing for the masses, energy etc. which will generate jobs as well as demand for cement, steel and engineering equipment among others. The fiscal deficit is also a concern area and it seems highly unlikely that there will be significant progress towards fiscal discipline right now.

Buoyant GDP Growth

The GDP growth accelerated to 8.0 percent. The recovery in growth was driven by significant turnaround in industrial output (9 percent), and services sector (9 percent), while agriculture sector also clocked a modest positive growth despite drought and floods in some parts of the country. Inflation measured by the Wholesale Price Index (WPI) registered significant volatility in the last year. WPI started showing signs of upward movement following a spurt in food prices and increase in global commodity prices. Continuous rise in commodity and fuel prices has ensured that now inflation has spread into manufactured products on the back of growing demand.

With the economy showing signs of revival, the RBI has signaled an exit from its easy monetary policy and has withdrawn all extraordinary measures (like various refinance facilities) and raised Statutory Liquidity Ratio from 24 per cent to 25 per cent. Rising inflation and inflationary expectations further added to RBI's concerns. The Central Bank raised the Cash Reserve Ratio by 75 bps in its January policy meeting, followed by a hike in policy rates - repo and reverse repo - by 50 bps each in May, 2012. RBI has also announced non-applicability of the PLR regime to NBFCs, thereby making borrowing costlier.

ABOUT TRIBUTE TRADING AND FINANCE LTD

Financial Performance-Overview

Tribute Trading and Finance Ltd. (TTFL) is a registered NBFC Company's standalone performance is discussed in the Directors' Report. The mainstay of Company' operations continued to be Investments in various Companies, under which steady dividend income flows into the Company coupled with

sustained appreciation in capital. During the year under review, Company has earned income in the form of dividends, and interest. The Company's core businesses remain as commercial finance and investments. The Company will extend the business further through identification of promising investment opportunities, through leveraging its resources. Company is also looking forward to expand its operations in the other fields permitted by the regulator, in conformity with its present status. Nearly 100 per cent of the operating profits were contributed by core businesses viz., commercial finance trading and investments.

Finance and Investments

The investment portfolio of quoted investments as on March 31, 2012 was Rs.8,580,510 at cost.

RISKS AND CONCERNS

Tribute Trading and Finance Ltd. is exposed to specific risks that are particular to its businesses and the environment within which it operates, which include market risk, interest rate volatility, execution risk, and economic cycle.

- The company has significant quoted investments which are exposed to fluctuations in stock prices. These investments represent a substantial portion of the Company's core capital, and are vulnerable to fluctuations in the stock markets. Any decline in these quoted investments may severely impact its financial position and results of operations.
- Liquidity Risk: Asset/Liability Management: The company is exposed to liquidity risk principally as a result of lending to its customers for periods which may differ from those of its funding sources. Financial firms are now increasingly focused on asset-liability risk. Asset-liability risk is a leveraged form of risk. The capital of most financial institutions is small relative to the firm's assets or liabilities, so small percentage changes in assets or liabilities can translate into large percentage changes in capital. The problem was not that the value of assets might fall or that the value of liabilities might rise. It was that capital might be depleted by narrowing of the difference between assets and liabilities that the values of assets and liabilities might fail to move in tandem.
- The Company is alive to the dynamics of this problem and has in place a control structure for closely monitoring incipient signs of risk in this

area and to unleash necessary corrective measures, if needed. TTFL's treasury actively manages asset liability positions in accordance with the overall guidelines laid down by the Management in the Asset Liability Management (ALM) framework.

- The company can be adversely affected by volatility in interest rates in India, which could cause its margins to decline and profitability to shrink. Earnings from interest income is steadily becoming one of the important businesses of the Company. It is therefore exposed to interest rate risk, principally as a result of lending to its customers at interest rates, in amounts, and for periods which may differ from those of its funding sources. The company is hedged to some extent against this risk through the reset clause in its advances portfolio.
- While the Indian economy has shown sustained growth over the last several years, a slowdown could cause the business of the company to suffer. TTFL manages such risks by maintaining a conservative financial profile and following prudent business and risk management practices.
- The risk appetite is enunciated by the Board from time to time

INTERNAL CONTROL SYSTEMS

Company has adequate internal control system commensurate with its size and nature of business. Conforming to the requirements of the regulatory authorities such as the RBI and the SEBI and consistent with the requirements of the Listing agreements with the Stock Exchanges, the Company has institutionalized an elaborate system of control processes designed to provide a high degree of assurance regarding the effectiveness and efficiency of operations, the adequacy of safeguards for assets, reliability of financial controls and compliance with applicable laws and regulations. The Internal Auditors are mandated to carry out periodical audit and report on areas of non-compliances/ weaknesses. Corrective actions in case of reported deficiencies, if any, are taken actively to further strengthen the internal control systems. These reports are reviewed by the Audit Committee of the Board of Directors for follow-up action, and instructions are issued for taking necessary measures

FUTURE OUTLOOK

The Company's present business operations are preponderantly that of an investment company, future of which largely depends upon financial and capital markets. Your Company has investments in financially sound companies.

Management is optimistic about the future outlook of the Company. Further, more promising areas of activity are being explored on a sustained basis. The Company will expand its activities, consistent with its status as a NBFC.

CAUTIONARY STATEMENT

Statement in the Management's Discussion and Analysis Report detailing the Company's objectives, projections, estimates, expectations or predictions may be "forward looking statements" within the meaning of applicable securities laws and regulations. These statements being based on certain assumptions and expectation of future events, actual results could differ materially from those expressed

or implied. Important factors that could make a difference to the Company's operations include changes in Government regulations and tax regime, economic developments within India and abroad, financial markets, etc. The Company assumes no responsibility in respect of forward-looking statements that may be revised or modified in future on the basis of subsequent developments, information or events. The financial statements are prepared under historical cost convention, on accrual basis of accounting, and in accordance with the provisions of the Companies Act, 1956 (the Act) and comply with the Accounting Standards notified under Section 211(3C) of the Act read with the Companies (Accounting Standards) Rules, 2006. The management of TTFL has used estimates and judgments relating to the financial statements on a prudent and reasonable basis. In order that the financial statements reflect in a true and fair picture, the state of affairs and profit for the year. The following discussions on our financial condition and result of operations should be read together with our audited financial statements and the notes to these statements included in the Annual Report
